

# Product Designer

Posted Sept 6, 2022 Location: Canada

We're looking for a talented product designer to join our remote team.

Someone with the experience and ability to take ownership of challenging problems from the early stages of conceptualization through to production-ready launches. This person demonstrates great attention to detail and takes equal pride in the quality of the visual design and user experience they produce.

gskinner is an award-winning digital studio based in Edmonton, Alberta, Canada. We are a team of talented and passionate professionals who get out of bed every day eager to work with each other and create innovative digital solutions that expand creative and technical boundaries.

We work collaboratively with great clients (*tech giants, major sport leagues, smart startups*) who appreciate our thoughtful approach to problem-solving, our craft, and our approach to design that enables us to create industry-leading applications, websites, and experiences using a wide variety of leading-edge and emerging technologies.

## Who you are

Design and creativity isn't just a job for you, it's a passion. You're a proactive learner with a hunger to explore new processes, tools, and emerging trends on your path of personal and professional growth.

Your self-awareness and communication skills are critical to your success. You work well in a collaborative environment by partnering with project managers, developers and other designers. You're comfortable working closely with our clients to help them create world-class solutions and experiences for a variety of mediums.

## What we're looking for

- A portfolio that demonstrates digital products or experiences that you've helped launch for clients
- A passion for combining visual, UI/UX, and motion design to create delightful and memorable experiences
- A thoughtful approach to design (research, sketching, wireframing, creating high-fidelity designs and prototypes) and the ability to present and discuss your work
- A knowledge seeker, eager to understanding new problems and find solutions
- Time management skills, and the ability to communicate progress and maintain deadlines
- A high-level understanding of the development process and the impact design decisions have on technical implementation

- You've created succinct hand-off documents for stakeholders, project managers and developers
- Experience with a modern design toolset including Figma, Sketch, Adobe XD, InVision, Miro, Zeplin and Abstract

**Bonus Points:**

- Experience using, creating, and maintaining design systems
- Interest and experience with 3D, VR and/or AR
- Familiarity with bug bases and agile/kanban

**About gskinner**

We strive to create an environment we'd want to work in (after all, we do).

- Stable and mature company, with 20 years of experience delivering successfully
- Top-tier clients: Microsoft, Google, PGA TOUR, Adobe, and more
- Diverse projects: Apps, tools/frameworks, VR, games, and interactive experiences
- Small (~15), super-capable, and creative team, with a passion for the work we do
- Fun, friendly, inclusive, and supportive with minimal stress
- Flexible hours and a strong focus on work/life balance
- Profit-sharing, health benefits, and competitive salaries
- Up-front training, regular check-ins, and ongoing mentorship from industry pros
- Collaborative environment with dedicated time for professional development
- Active participation in the industry and open source
- We're currently fully remote, but actively try to create opportunities for collaborating/interacting both online and in-person (when appropriate/responsible)
- Headquartered in Edmonton, but our team is located throughout Western Canada

**Experience:**

- UX/UI or Product Design: 2+ years

**Job Type:**

- Full-time, Permanent

Benefits:

- Work from home
- Casual dress
- Flexible schedule
- Paid time off
- Dental care
- Extended health care
- Life insurance
- Vision care
- Disability insurance
- Company events
- Regular team meals

COVID-19 considerations:

- Fully remote
